New Features

The following is a list of new features in the Veeam FastSCP 3.0.3:

- Support for VMware vSphere 4.1. Veeam FastSCP now supports VMware vCenter Server 4.1 and VMware ESX(i) 4.1.

The following is a list of new features introduced in the Veeam FastSCP 3.0.2:

- Added support for Microsoft Windows 7 and Microsoft Windows Server 2008 R2.
- VMware vSphere 4 is now "officially" supported.

The following is a list of new features introduced in the Veeam FastSCP 3.0.1:

- Added support for ESX 3.5 Update 4.

The following is a list of new features introduced in the Veeam FastSCP 3.0:

- Full ESXi support.
- Improved file copy scheduling options.
- Improved user interface.

Resolved Issues

The following is a list of issues resolved in the Veeam FastSCP 3.0.2:

- FastSCP doesn't process *-flat.vmdk* files on ESX(i) 4 when using agentless mode.

The following is a list of issues resolved in the Veeam FastSCP 3.0.1:

- *Inactive datastore* error when trying to copy files to/from online NFS datastore connected to an ESXi host.
- If the daily scheduled copy job's schedule is set to skip some days, the job always start at 12am on the next day it is allowed to run.
- *Unknown api version* error displayed when processing vCenter containing older versions of ESX servers (prior to ESX 3.0).
- File deletion errors are not displayed correctly.

System Requirements

VMware Infrastructure

Hosts

- VMware ESX(i) 4.x
- VMware ESX(i) 3.x
- VMware Server 2.0 (experimental)

Software

- vCenter Server 4.x (optional)
- Virtual Center 2.0 or later (optional)

FastSCP Console

Hardware

CPU: Pentium IV or faster

Memory: 512MB RAM

Hard Disk Space: 10MB

Network: 100 Mbit/sec or faster preferred due to performance considerations

OS

- Microsoft Windows XP SP3
- Microsoft Windows Server 2003 SP2
- Microsoft Windows Vista SP2
- Microsoft Windows Server 2008 SP2
- Microsoft Windows Server 2008 R2
- Microsoft Windows 7

64bit operating systems support is experimental. See the [Known Issues](#) section below for more information about current limitations.

Software

- Microsoft .NET Framework 2.0 or later

Known Issues

The following is a list of issues known to exist at the time of the Veeam FastSCP 3.0.3 release:

General

- Creating new folder, and copying files within the same datastore fails with COM error when FastSCP is installed on the 64bit OS and agentless data transfer mode (ESXi) is used. Service console agent based data transfer mode (ESX and Linux) is not affected.
- Scheduled file copy job statuses do not refresh automatically. Click the **Refresh** button to update the status for all jobs when required.
- Under certain circumstances, making changes in FastSCP user interface while a file copy job is running may result session information and statistics loss.
- Local administrator rights are required to setup and run FastSCP.

Technical Support
